## KIWANIS WILL PUSH CAMPAIGN FOR CAMP SITE

BOARD OF CITY DEVELOPMENT ASKED TO GIVE CO-OPERATION.

The Kiwanis Club decided to push the campaign to secure an Amarillo camp ground in the New Mexico Forest Reserve at its weekly luncheon Wednesday noon at the Amarillo Hotel. It is offering the proposition to the Board of City Development was made with the provision that the club would bear a reasonable proportion of the expenses involved in securing the site. This action was taken because the park would become one for the municipality.

First Brandenburg, chairman of the public affairs committee, reported upon the steps to be taken for getting a site. Plainview has one and he read a letter from E. H. Perry of that city relative to the park.

Mr. Perry's letter in part follows: "The government has provided for these camp sites in the national forest reserve of New Mexico and the sites are available to either individuals or towns. To the towns the charge is \$5 per year. Permit is first issued for two years with the understanding that if improvements are made on the site selected, the permit will then be extended for 12 years longer. To all intents and purposes the site is yours. Individuals can secure a like privilege by paying \$15 a year."

Send your locating committee to either to the ranger in charge of the field work west of Las Vegas or to Mr. Johnson, the ranger in charge north of Pecos, and he will show you the available sites and instruct you as to making application. In the forest west of Las Vegas, he is sure you will find something desirable. "Along the Pecos there are several sites that are fine, and I believe that you will not be disappointed there. Plainview has a wonderfully choice site on the Holy Ghost creek about one mile west from the junction of this creek with the Pecos. This is also located along the Pecos, and is near to the Plainview site."

## YOUTH IN PORTALES JAIL MAKES ESCAPE

Special to The News.

PORTALES, N. M., Aug. 31.—Lonnie Kirby, one of the boys who was sentenced to two years in the reform school at Springer, N. M., on a charge of car theft, broke jail here Sunday night, and up to this time has not been recaptured.

"PASSING THRU" SCORES  
The blowing up of a brick bank building, within which are all the principal characters of the story, is but one of a number of thrills that makes "Passing Thru," Douglas MacLean's latest Thomas H. Ince comedy for Paramount, which was shown at the Mission theater yesterday, one of the most sensational as well as humorous screen offerings of the season.

The comedy incidents and situations, however, are the outstanding features of the production. Douglas MacLean and his supporting cast getting the most out of every one of the story's humorous twists. Madge Bellamy, locally known as Marguerite Philpott, heads an excellent supporting cast.

Natives of Java collect birds' nests made of seaweed for soup.

## 155 CIVIL CASES ON DOCKET FOR DISTRICT COURT

SKILLMAN BELIEVES DIVORCE SUITS ARE FALLING OFF.

One hundred and fifty-five civil cases are on the docket for the September term of the district court, according to a count made late yesterday by District Clerk J. C. Skillman. Sixty-one of these are new cases, while the remainder have been continued from previous terms.

The 155 cases are divided as follows: 24 jury, 55 non-jury and 76 appearance docket cases.

Although Mr. Skillman did not count the divorce cases, he believes that the number filed will be less than it has been during several preceding September terms.

Approximately 25 to 30 criminal cases are on the docket, and Mr. Skillman estimates that about 25 cases have been bound over from justice of the peace courts to await the action of the grand jury.

## Berggrun to Open Dramatic School In City This Fall

Edward W. Van Berggrun, who has been in charge of musical activities at Bendemeer, a summer resort near Denver, is in Amarillo making plans for the opening of a vocal and dramatic studio. He plans to open the studio as quickly as possible.

Mr. Berggrun plans to remain one season in Amarillo and possibly two, although it will be necessary for him to go to Bendemeer during the summer seasons.

His reason for coming to Amarillo is that it has a much lower altitude and he said that vocal development was not so satisfactory in the Colorado altitude as it is here, according to his observations. With this city having direct connections with Trinidad and Denver, from which will come most of his students, Mr. Berggrun decided this was the logical center.

Mr. Berggrun has been in grand opera business for 25 years, 10 of which was spent as a baritone with the Savoy Grand Opera Company. During the past season he was with the Robin Hood Opera Company.

Organization of a festival chorus company at Amarillo is planned so that some operas may be given.

## CAN ANIMALS TALK?

Can monkeys and other animals talk? The old question was revived by an interesting incident during the filming of "Miracles of the Jungle," the sensational federated animal production, the first two chapters of which will be shown at the Olympic theater on Thursday and Friday.

One of the huge apes in the picture escaped during the "shooting" of the film, and went to the very top of a lofty palm tree. No amount of coaxing could get him down until one of the African natives who took part in the chapter play, started a queer jabbering conversation with the monkey, which the animal replied with spirit.

Purity and healing power are the chief characteristics of Liquid Borzone. It is made from pure, natural borax. Sold by Randal Drug Co.

## SPEARMAN LINE CAR SHORTAGE ALL OVER NOW

GOVERNMENT OFFICIAL FINDS CONDITIONS MOST SATISFACTORILY.

The car shortage on the Spearman short line, which was the worst in the Panhandle, is a thing of the past, H. M. Priest, a bureau of service of the Interstate Commerce Commission, reported yesterday to Frank H. Jamison, secretary of the Panhandle Plains Chamber of Commerce.

Priest has been working on the Spearman branch situation for ten days. He was brought to the Panhandle through the efforts of the Panhandle Plains Chamber of Commerce.

There are still thousands of bushels of wheat to be hauled out of towns on the branch, Jamison says, and he expects this to be moved just as fast as the farmers and elevator men desire to market it.

The Interstate Commerce Commission map conferred with local rail heads concerning the general condition over the Panhandle, and predicted before he left that the situation would rapidly clear up.

## "Sweet September" The Poet's Month Is Welcomed Here

O, sweet September, thy first breezes bring  
The dry leaf's rustle and the squirrel's laughter,  
The cool, fresh air, whence health and vigor spring,  
And promise of exceeding joy hereafter.

George Arnold, a little known English poet, once scribbled these lines while intoxicated by the joys of September, and while his phrases do not exactly describe conditions in Amarillo, Panhandle weather fans are also exuberant over the prospect of September "cool, fresh air."

As the first September sun arises this morning local sufferers will have a sigh of relief, knowing that the worst is over. August brought forth the hottest weather of the season here as in other places, and Panhandle residents, not used to the sweltering weather which is always the part of residents in other sections of the country, suffered with the heat considerably.

Several days during August the local weather station reported that the mercury had ascended to 100 degrees, which is exceedingly hot for this summer resort, and suffering humanity here is looking with eager eyes to September for respite from suffering.

And soon will come the "dry leaf's rustle" and other signs of fall, the time of school days, hickory nuts, new hats, harvest carnivals, world's series, football games, and other joys which brighten autumn's sober span.

And then the joyful sons of Nimrod will grab their trusty rifles and double-action shot-guns and hie themselves away to some lake or field of kaffir corn and lay in ambush and wait for the passage of the migratory ducks and geese, whose flight towards the warm Gulf of Mexico is a sure herald that cold weather is coming.

The property of the United States is about 80 per cent insured against fire.

## FAIR BOND SALE REPORTS TO BE LEARNED TODAY

SOLICITORS REQUESTED TO TELL RESULTS THIS AFTERNOON.

All sub-committees in charge of soliciting funds from the different branches of business in the city are urged to meet with the general finance committee of the Tri-State Fair this afternoon at 4:30 at the Board of City Development for the purpose of finding out just what the present financial status is.

Frank H. Jamison, general manager, has called the meeting, and requests a full attendance, so that the progress of the sale of the fair association bonds can be ascertained.

It is expected that several more sub-committees will be ready to report a full quota of subscriptions for their lists at the meeting today, and those who are not having such good luck will be given some assistance with their problems.

## Classifying of Freshmen Begins This Afternoon

Classification of sophomores at the Amarillo High School will end today noon, and the remainder of the week will be devoted to enrolling freshmen. Tonight and Friday night the office will remain open from 7:30 to 9 o'clock to classify those pupils who are working during the days, said Principal W. A. McIntosh.

Estimates are that more than 250 persons have already been classified, and that at least 300 freshmen will enroll. With others coming in during the week, the number classified should reach 550 by the weekend, said McIntosh.

Teachers who will help classify today are Mrs. C. P. Atwood, Miss Lena Gilbert, Miss Clay Watkins, Miss Flora McGee and Oscar Wise.

## Rotary Club Begins Attendance Contest At Luncheon Today

The Rotary Club will begin an attendance contest today for the Allan Early cup. The contest will cover a period of three weeks, and will close Thursday, November 24. Captains of eight teams have been appointed as follows by the president:
